This is a winner! I think Cessna has made this app even less user friendly than before ... it works once I understand the app but the use of more pages and the menu options are only confused they must return to the drawing table And keep in mind simple is better and add things that are user friendly - like the automatic migration of your weight from CLCALC to CPCALC !! The developer, Textron Inc., indicated that the privacy practices of the App[™] S can include data management as described below. I am happy. "Louis F. and at \$ 9.99 à € **Å** **Å** [™] also. For more information, see the Privacy Policy à [™]. Excellent program and excellent service. The Aviation W&B Calculator simplifies the precise load of the There are many ways to calculate the weight of the plane and the balance with an iPad, but the best method that is found is with the Aviation W&B Calculator app. It is easier, faster, often, often provides Better field performance and more high take -off weights compared to the AFM.à € à € à € à € the planning calculator uses a world airport and Navaid database to plan a path by calculating the travel time, fuel and distance. à €. "Use" Thanks for the weight and personalized balance program - it is fantastic. "Paul K. is simple, easy to use, and we are completely satisfied." Calvin S. fast, easy, mobile à € "do not leave home without its. After immediately calculating the weight/landing weight and the gravity center, the app also traces the gravity center (CG) on an envelope of the aircraft. Delport à € "New Zealand" Great investment and piece of mind especially when flying with 3 adults on board. Testimonies "we are very happy to have an efficient service provider such as eflite. Entry of the Airomobile data when you open the app for the first timeà € **Å** **Å** [™] you will see a large list of weight models and balance including most Cessna, Piper and Cirrus aircraft. The Busta function shows the CG graph of aircraftAs, of aircraftAs, .otarucca e odipar odom ni af ol e aznegreme id etamaihc ella erehdopsir rep opmet li ecludir erawtfos li .ppa'l noc itolip enoisrevni odipar li rep eizarG" ASU -.M oicangl "!!! inoizalutargnoC !!! ocitsatnaf arbmcs otseuQ" otinU ongeR - .osep led atartne id anigap alla etnematterid eradna e otavlas adoc id oremun nu eranozeles elibissop **Å** iuc ni .itireferp led ocnele nu **Å** egap emoh allen etnacnam arbmcs ehc. The large graph clearly shows the CG position that performs a weight and balance calculation after saving the empty weight of the aircraft and CG, **Å** time to enter the weights of the pilot, passengers, baggage and fuel. Don't worry if your plane is not listed - there's an option to "build your plane" and create a customized model and a CG envelope based on your poh numbers. New aircraft deliveries shall include a subscription for the aircraft warranty period at no additional cost. Cesnav combines three computers (formerly known as Ccnaic, CPCALC, and EOM) into one app, providing a unified experience from sharing calculations between computers to a combined results screen. Thank you for your services. "Abu Dhabi Aviation - U.A.E." I would like to thank you for your quick and professional assistance on our Boeing 757. The data here is well organized and you will find shortcuts at the summit Screen by email, save or print the information (useful for sharing with a co-pilot). - USA "Thank you for your excellent technical support!" Rusline- Russian Federation "Thank you for a quick and efficient service, well done, shame that Jeppesen can not produce the same service for what they charge." MARTIN H. McLean - USA "I am amazed to get such superb service, even on Sunday. - USA" Thank you for an excellent service! "P. The **Å** app is quick, responsive and allows the flight crew to test various years to test various combinations of passengers, load and fuel load. It's worth the money! "C. Cessna added another tool to improve security by making last-minute weight and balance calculations easy. - United Kingdom "Very nice program! Thank you all to EFLITE." Mary Jo M. After a few button touches, will be back to the data entry screen where you can adjust the weights for that day's flight. A very satisfied customer. "Tony Z. - Use" We use the Eflite weight and the balance software before each flight without problems. **Å** àvelop the loading calculator uses a specific specific aircraft and balance files and allows to quickly determine the take-off and landing weight and CG after the entry of passengers, cargo and fuel. The next step is to enter the unique data the **Å**s aircraft into the aircraft model. The models include all data required to perform normal calculations, including aircraft arm standard positions, weight limitations, and any unique CG envelope the aircraft**Å**. The load calculator can also be used with any aircraft 550, 560, S550 or 208 (208 with TKS currently not supported). Sign in to add and edit your software Continue with email Sign up for Download.com, accept our Terms of Use and confirm your data practices in our Privacy Policy. Cesnav **Å** available for all current Production Quotes and the following models: CitationJet, CJ1, CJ1+, CJ2, CJ2+, CJ3, Bravo, Encore, Encore+, Excel, XLS, Sovereign, and X. All **Å** without limit of precision and **Å** very easy to use." Tom K. K.
